

Press Release

Zeller+Gmelin strengthens management

Alexandra Scaglione has been a member of the management of Zeller+Gmelin in Eislingen since 1 December. The new Managing Director is responsible for Finance & Controlling as well as HR within the ZG Group. She replaces the long-standing Managing Director Walter Jerusalem, who will retire in May 2023.

"We are pleased to have an extremely experienced financial expert at our side in Ms Scaglione," emphasises Siegfried Müller, who is responsible for the operative business at Zeller+Gmelin.

The new ZG Managing Director started her career as an auditor at Ernst & Young and as a management consultant at Roland Berger. Alexandra Scaglione brings additional experience from more than 10 years in audit and finance at Harman International and most recently nine years as Finance Director at Valeo GmbH in Bietigheim-Bissingen. At Valeo, she was responsible for finance and accounting, taxes, customs and IT for

domestic and foreign subsidiaries. Under her leadership, numerous projects in the areas of digitalisation, system integration and process efficiency were successfully implemented.

"The globally active ZG Group with its lubricants, printing inks and process chemicals divisions is a demanding company and I am very much looking forward to the new challenge," says Alexandra Scaglione.

About Zeller+Gmelin

Zeller+Gmelin is an independent, medium-sized family business that was founded in Eislingen in 1866. Over the decades, ZG has developed into an international partner for high-quality lubricants for industry, vehicles and machines as well as printing inks and chemical products. With approx. 1000 employees worldwide and 16 subsidiaries, Zeller+Gmelin delivers to 80 countries around the world and, in addition to Eislingen, has one production site each in the USA, China and Great Britain. The high-quality products occupy a leading position on the international market. Zeller+Gmelin offers individual and holistic solutions from a single source, from research and development to production. The conscientious use of resources and responsibility towards future generations are central components of the company's philosophy. For years, the company has been successfully working to reduce its ecological footprint and, since January 2020, has been the first chemical company in Baden-Württemberg to be allowed to call itself a "climate-neutral site".

ZELLER+GMELIN

The research and development departments are continuously working on innovative solutions that relieve the burden on the environment and improve customers' processes.
